Letter 1

addressed to: Professor Miyata Hagane

This letter was folded an extra time to fit into an envelope. There are extra fold lines showing where several folding patterns had been tried and not worked.

Professor Miyata,

I am writing to inquire about getting notes or lectures or something for your ~~I think~~ upcoming aetherology class. I'm trying to keep up with learning more traditional aetherology while I learn about how ~~these weirdos~~ Alexandrians use aether through electrope.

Thanks

Aly & Sparks

PS I remember something about classes and if I'm right and you're teaching after I leave I don't wanna miss it pleeeeasseeeeeeee

Also could you let me know who else is doing interesting classes? thanks byeeeeeee

Letter 3

A number of pages arrive in a bundle, including some inelegant but clear diagrams. The first page is a separate letter

Miyata,

The notes were appreciated, and I've included some clarifying information on electrope from the libraries here and a few examples of how arcanima and arcanima derived runes are used in conjunction with it. The information here is a bit more general than I'd really like, but I'll be seeing about getting some more hands on time with some of the equipment and computers shortly. The librarians have been ~~evasive unhelpful~~ less forthcoming with details but hopefully the teachers are willing to give me a closer look at the equipment ~~that I'll get one way or another~~

I've reached out to Rowan and a few others, I'm likely to wait to speak with Syvenet specifically since I suspect practicing his lessons would ~~scare piss-off~~ cause concerns as a foreigner here.

I'll do my best to be a good representative of Eorzeans here ~~but no promises~~

yours, aly
